#### 1. Premise

During the 4th Consortium trans-national meeting (Vienna – 22 and 23 September 2014), the Interpreting our European Heritage partners have shared a common approach to organise the activities of work package 4, aimed to design the European professional figures in the tourism sector, starting from the perimeter of professional figures identified in a shared way by the partners across VET systems of participating countries during WP 2 activities.

The partnership decided to work on the following main professional figures:

- Interpretive Host
- Interpretive Guide

According to this articulation of the competences of concerned professional figures, the partners have proceeded with the shared definition of activities, tasks, skills, knowledge, units of learning outcomes and ECVET credits for each one of these professional figures, by means of a common tool specifically elaborated for this aim.

Utilising this common tool, the partners have designed, from July till December 2014, both the European common, and the specific territorial competence areas.

In the following pages are presented the professional figures as designed by the partners.

The contents of first and second competence areas are commons to all participating Countries.

The contents of third competence area are articulated in several "addenda", one for each participating Country, common for the professional figures.

The ECVET total credits are 60 for both the Interpretive Host and the Interpretive Guide.

## 2. Section A – Common European competences (activities, tasks, skills, knowledge, competences/ units of learning outcomes and ECVET credits) transversal to the professional figures of "Interpretive Guide" and "Interpretive Host"
